SUMMARY

I'm a Software Engineer with hands-on experience in web development and application design. I work with CSS, Bootstrap, Laravel, JavaScript, PHP, HTML, Jira, AWS, Git, GitHub, SQL, and RESTful APIs. I'm also familiar with Agile methodologies. I focus on writing solid code, working well with teams, and solving technical problems. I'm eager to bring my skills and creativity to new projects and contribute to your team's success.

WORK EXPERIENCE

JBSI Group of Companies - Junior Software Engineer Jan 2023 - Present

- Developed and maintained software applications, focusing on website development using Laravel PHP.
- Added new features based on project requirements and user feedback.
